

German Shepherd

Validation Evidence Pack

Track 02 · Validate — test a company's story and make the evidence usable

“See your policyholders the way attackers do.”

We show insurers and building operators exactly what attackers already know about a physical space - from public, passively gathered data alone.

As of 7 June 2026

Every claim is dated, sourced and independently checkable.

THE HEADLINE

Proof at a glance

£500

First revenue received

TMC deposit - Stripe, 3D-Secure,
Succeeded

£60k

2 signed LOIs + a paid pilot

Bolttech £30k · Upahaar £30k · TMC
£20k pilot

36h

Field validation sprint

Real buildings entered, frontline staff
interviewed

Live

Working product

Address -> physical risk surface, every
finding sourced

Two signed LOIs (£60k), a paying customer already in (TMC deposit, signed LOI to follow), and more LOIs in motion. This page is the proof, not the pitch.

WHO'S IN

Traction: real customers, two go-to-market paths

Bolttech

Insurer channel

£30,000

SIGNED

Signed LOI + reseller rights into their insurer network. Follow-up endorsement from the signatory.

Upahaar

Direct enterprise · Nashik

£30,000

SIGNED

Signed & customer-countersigned LOI (email confirmation on file). Office had repeated break-ins.

TMC Solicitors

Direct enterprise · Manchester

£20,000

PAID PILOT

Paid £500 deposit; signed LOI to follow. Law firm with 2 break-in attempts in the past year.

PIPELINE

Eric (insurance, introduced by Lyndon) - called last night, interested, meeting this morning to scope a further LOI.

First revenue - money in the bank

TMC SOLICITORS

£500.00

Deposit received - toward the £20,000 pilot

- Stripe · Visa credit card · 3D-Secure authenticated
- Status: Succeeded · 6 Jun 2026, 23:52
- Paid by Moeed Chughtai on his father's behalf

Why this matters

- A customer has paid real money - the strongest signal of demand.
- The pain is concrete: TMC, an immigration/asylum law firm, had two break-in attempts in the past year and handles confidential files.
- Reached via Moeed (AMe cohort); his father is the principal solicitor.
- Signed LOI to follow - finalisation meeting scheduled (see pipeline).

Verify: open the Stripe receipt - £500.00 GBP, Succeeded, 3D-Secure, charged 6 Jun 23:52.

SIGNED COMMITMENTS

The Letters of Intent

Customer	Value	Access	Status
Boltech Baldev Singh - RGM / Chief Growth Officer	£30,000	12 months full access + 1 free month	Signed
Upahaar Aditya Kakuste - Founder's Office	£30,000	12 months full access + 1 free month	Signed & countersigned
TMC Solicitors Muazzam Chughtai - Principal Solicitor	£20,000	Month 1 free, then 12 months + 1 free month	Deposit paid · LOI to follow

All three pilots include live wireless scanning, corporate OSINT, exposed-infrastructure mapping, planning-record lookup and the building intelligence graph. Full signed PDFs are hosted on the /validate dashboard for judges to open.

CUSTOMER ENDORSEMENT

The decision-maker is championing it

“Very pleased to see the developing idea... both the customer and the insurance industry benefit from reduced losses through early prevention... I would be happy to take this further with the industry to socialize it and gain interest. Initiatives such as these are certainly at the forefront of new tech development powered by AI.”

- Baldev Singh, Bolttech (follow-up email, with the signed LOI attached · 7 Jun 2026)

This moves Bolttech from “signed document” to “signed document + decision-maker actively championing it with the wider industry.”

DEMAND, VALIDATED IN PERSON

Field research: consent-based frontline interviews

Shahab

Restaurant / building staff

Cameras, sensors, control-room alerts, radio checks - the gap is ambiguous human incidents, not locked doors.

Security officer · ex-Peninsula 5★

Commercial building

An intruder wore an NHS lanyard to pass as a contractor, walked in and stole a bike from the basement.

Security officer · residential

High-rise, London

Intruders reached a neighbouring roof via a crane (police chase). Lone-worker cover is the weak point.

Aziz

Reception

Declined recording - captured honestly as a research-process lesson.

What we learned: sites already have the hardware - the real gap is ambiguous human moments (tailgating, impersonation, who-belongs). That's the physical risk insurers underwrite, and what German Shepherd surfaces from the outside.

VERIFIED LIVE AT /APP

The product is real and runs

- **Natural-language command bar**
Ask anything; an LLM drives the map and panels.
- **Corporate OSINT recon**
Exposed infra, subdomains, tech stack - with provenance.
- **Live Bluetooth (BLE) heatmap**
Nearby BLE devices as a distinct heat layer.
- **Crime + designation overlays**
police.uk crime; conservation/listed/Article 4/TPO.
- **3D map + planning-record lookup**
Live council registers; public drawings classified.
- **Live WiFi heatmap**
Real device signals by RSSI -> distance (honest estimate).
- **CCTV discovery + live feed**
Finds cameras on-network; RTSP -> MJPEG stream.
- **Intelligence graph + report**
One graph, exportable as a sourced evidence report.

Real-data-only: missing keys return an honest empty state, never mock data. The hosted build shows the full UI and public-data flows; live radio/CCTV/OSINT scanning runs against the local backend.

SIGNIFICANCE

Why the truth matters

We insure the insurer.

We show insurers what attackers already know about their policyholders, so clients are more secure and insurers pay out less.

- Building-level physical risk (passive signals + OSINT + the planning record) is a dimension existing underwriting data does not cover.
- Three customers across two go-to-market paths - insurer channel (Bolttech) and direct enterprise (Upahaar, TMC) - with first cash already received.
- Bolttech offers a distribution channel into a whole insurer network (device, property, SME risk), not a single team.
- Acute, repeatable pain: two of three customers had real break-ins. The value is tangible, not theoretical.

THIS MORNING

Upcoming meetings - live pipeline

THIS MORNING · 7 JUN

Get the signed LOI sorted

TMC Solicitors · Muazzam Chughtai

Deposit already paid (£500). Meeting to officially sort and countersign the £20k pilot LOI.

THIS MORNING · 7 JUN

Scope a further LOI

Eric · insurance

Introduced by Lyndon; works in insurance. Called last night - interested, asked us to call back this morning.

Forward-looking pipeline, shown for transparency - not counted as closed proof.

How a judge verifies all of this

- 01 Open the live evidence dashboard at /validate - every claim links to a dated, checkable source.
- 02 Open the signed LOI PDFs (Bolttech, Upahaar) and the TMC LOI document + Stripe receipt.
- 03 Run a live scan at /app - confirm sourced findings, real-data-only (no mock).
- 04 Read the field-research interviews and watch the on-site footage.
- 05 Anything not yet third-party-verifiable is flagged “Our log” / “Pending”; nothing is fabricated.

Evidence pack: spectre-peach.vercel.app/validate

Hosted PDFs: Bolttech LOI · Upahaar signed LOI + email · TMC LOI · Stripe receipt · field footage
