Re: Letter of Intent — Platform Evaluation Pilot & 24-Month Software Access

About German Shepherd

German Shepherd turns any address into a physical risk surface using public and passively gathered data: wireless signals, corporate OSINT, exposed infrastructure, and the planning record. No active intrusion, no occupant disclosure. Its thesis: we show building operators what attackers already know about their premises.

This letter sets out the terms of a pilot engagement between German Shepherd and TMC Solicitors Ltd, under which TMC Solicitors will evaluate the German Shepherd platform applied to its commercial office premises at 4 Central Buildings, Kingsway, Manchester.

Law firms are high-value targets: client confidentiality obligations, sensitive case files, and regulatory exposure under the SRA make physical and digital perimeter risk a material concern. German Shepherd surfaces that exposure — from wireless signal leakage and exposed infrastructure to planning record intelligence — giving the firm a clear picture of its attack surface before an incident occurs.

Pilot Structure & Payment Terms

The pilot runs for an initial period of one month, during which TMC Solicitors will have full access to the German Shepherd platform across its office premises. No payment is due during this period.

At the conclusion of the first month, both parties will review the pilot outcomes. If TMC Solicitors is satisfied with the platform's performance, a payment of **£20,000** will be triggered, unlocking **24 months of continued full platform access** plus one additional month free upon full product launch. If the pilot does not meet expectations, no payment obligation arises.

The undersigned hereby expresses intent to proceed on the following basis:

- **Month 1 free pilot** — full platform access at no cost for the initial evaluation period.
- **£20,000 payment** triggered at the end of Month 1, contingent on satisfactory pilot outcomes as agreed between both parties.
- Upon payment, TMC Solicitors receives **24 months of continued full platform access**, including live wireless signal scanning, corporate OSINT, exposed infrastructure mapping, planning record lookup, and the building intelligence graph.
- Upon full product launch, TMC Solicitors will receive **one additional month** of platform access at no charge.
- Both parties to collaborate on use-case scoping, technical walkthrough, and signal-to-risk interpretation relevant to a legal practice environment.
- Progress toward a formal commercial agreement subject to satisfactory pilot outcomes.

Deliverables

Building intelligence report	Detailed risk profile for the TMC Solicitors office premises covering wireless exposure, OSINT findings, infrastructure vulnerabilities, and planning history.
Signal-to-risk summary	A plain-English mapping of German Shepherd findings to physical and digital risk categories relevant to a legal practice.
Pilot evaluation report	End-of-pilot summary (Month 1) covering coverage metrics, data quality, and a mutual go/no-go recommendation on continued access.
Platform access (24 months + 1)	Full access to all German Shepherd platform features upon payment confirmation, with one bonus month granted upon full product launch.

Warm regards,
